

City of St. Johns
TORNADO SIRENS TESTING/EARLY WARNING SYSTEM

At noon on the first Saturday of the month (April thru September), the City tests the City's tornado sirens (early warning system). This test will be conducted unless there is severe weather in the area.

The City of St. Johns recently had a new tornado siren installed in the main City Park. This new siren replaces three old sirens that were located at the St. Johns High School, Mahle and Jiffy Muffler (M-21 and Baker Street).

Tornado sirens are located at the City Park, Clinton Memorial Hospital and just east of Federal Mogul.

As always, use safe weather practices for protection of your family when severe weather is approaching.
